SRP £249.00

2-Speed Analog Turntable with Phono EQ and Bluetooth

Colour

PRODUCT DETAILS

A wireless turntable for a new way of enjoying vinyl records.
The TN-280BT is not only a great-sounding turntable for music enthusiasts who want to enjoy vinyl records. Bluetooth technology introduces you to a whole new way of listening.

The TN-280BT also accommodates a built-in Phono EQ amplifier that provides Line output, and allows you to connect to almost any sound system, regardless of input type.

The belt-drive motor on the TN-280BT reduces vibration for a sweeter, more accurate sound than direct-drive DJ turntables have, while an aluminum die-cast platter and anti-skating system provide a solid foundation for great-sounding playback.

The high-performance, upgradable MM cartridge captures every detail on your record, and the statically balanced straight tone-arm ensures clear sound.

For music enthusiasts who want to hear every sensuous note of their vinyl collection.
