DETALLES DEL PRODUCTO

A high-powered Integrated Amplifier employing sophisticated differential input discrete amplifier circuitry

The A-R650 MKII amplifier provides up to 2 x 120W of output power and can be used with speakers of between 4 and 16 impedance. That makes it the perfect amplifier choice, regardless of whether it's to be used with bookshelf monitor speakers or large floorstanding speakers.

Because the amplifier is equipped with two pairs of speaker outputs you can also enjoy simultaneous sound in separate rooms.

Further features include an adjustable microphone input and a headphone output. A Phono input with built-in Phono equalizer amplifier is another attractive feature for traditional audiophiles.

A system remote control unit that's able to control the CD-P650 CD Player and any UR-tagged TEAC components also comes as standard. TAPE2 Monitor delivers monitor sound from the TAPE2 input to the speakers, regardless of the input source.

Main features

- 120W + 120W Output Power at 4 ohms
- FET differential input three-stage pure complementary discrete power amplifier
- 7 Audio Inputs including Phono Input
- Built-in Phono-equalizer Amplifier (MM Type)
- Mic Input with Mic Mixing
- Two Selectable Speaker Channels (Speaker A and B)
- TAPE2 Monitor
- Balance Control, Tone Control (Bass, Treble), Loudness
- Source Direct
- Headphone Out
