CD Player with USB Recording

PRODUCT DETAILS

CD Player with many Functions
This full size player is able to manage CD, CD-RW, and MP3 discs. Programmable functions like repeat, shuffle and so on ensure a maximum of impressing sound experience. The USB port on the front side allows recording and playing favorite songs to a MP3 player.

Additionally an iPod® or an iPhone® (not scope of the supply) can be docked to the USB interface. This connection makes it possible to process the iPod® audio data immediately, digitally, and free of losses with the integrated 1 bit converter. At least the processed data will be routed to an amplifier and to speakers to play it. But there is even more. Beside the impressing basic functionality Apple® devices will be charged at the same time.

The earphone jack and an optical digital output make the TEAC CD-P650 perfect equipment. It can be controlled manually or with the provided remote control.
To get a powerful hi-fi system you only have to add the best fit amplifier A-R650 and the stereo receiver T-R650 which were also provided from TEAC.
