PRODUCT DETAILS

Wide-range response in a compact body for concise listening - even at low volumes.
The difference of the LS-M100 from standard PC desktop speakers is the luxury sound quality. With a frequency response of 80 HZ to 22 kHz from its compact body, every sound is faithfully reproduced - from the body resonance of a bass drum to a tinkling wind chime.

The wide response is due to the 2-way system - consisting of a woofer and tweeter - and the bass reflex port located on the rear of the cabinet.

Main features

- Compact size - 4.5” x 6.7” (110mm x 170mm) - cabinet design
- The 2-way system and bass reflex port produces a wide frequency response of 80 Hz - 22 kHz.
- Efficient 14W per channel power amplifier
- Equipped with RCA pin jack and stereo mini jack line input terminals. Capable of connecting with CD Player or Analog Player.
