

NR-7CD Network CD Player/Integrated Amplifier, Black

248079

SRP 3 999,00 €

Integrated amplifier, network player and CD-Player with high quality VERITA AK4490 DAC and a rated output power of 2x100 W (4, 1 kHz, THD 0.07%)/max output power of 2x230 W (4, 1 kHz, THD 10%). Not only can it play music from analogue sources, but also via Bluetooth, USB or WIFI with full support for TIDAL and Qobuz. Comes with a dedicated master clock built in.

Colour

Style UK POWER PLUG, EU POWER PLUG, **EU POWER PLUG**

PRODUCT DETAILS

TEAC's devotion to sound quality, recognized by professionals the world over, started in the era of reel-to-reel tape. Today, Teac have fused their passion for sound with the latest network audio features and state of the art audio technology.

As the first model in the Reference 7 Series, TEAC invested the NR-7CD Network CD player/ Integrated amplifier with all the high-resolution playback expertise that TEAC has accumulated over the decades through the development of high-end and pro audio equipment.

From high-resolution master audio sources, including DSD 5.6MHz and PCM 384kHz/32-bit, to the classic albums sleeping in the corner of your CD library, and from the vast collections of music provided by premium “loss-less quality” on-line music subscription services such as TIDAL and qobuz on Internet, to high-quality wireless music streaming via Bluetooth®, this unit can handle them all in style.

Despite being multifunctional in nature, this is a no-compromise device. Every stage, from the D/A converters to the power amplifier section, it employs a dual monaural circuit design, and every audio signal is processed on fully-balanced circuit from the beginning to the end. The RDOT-NEO is remarkable, that up-converts incoming digital audio signal including conventional CD to DSD12.2MHz or PCM 384kHz which is Hi-Res audio quality, while free control app TEAC HR Streamer provides look-and-feel operation on you r smartphone/tablet.

Highly-experienced craftsmen undertake the entire process from soldering to assembly. With a "Made in Japan" label comes immense attention to detail, as well as a level of sound quality that’s appropriate for the flagship of our Reference Series.
