SRP 199,00 €

3-speed Analog Turntable with Phono EQ and Bluetooth

Colour

PRODUCT DETAILS

The simplest way of enjoying vinyl records
The TN-180BT brings you a totally new way of listening to vinyl records with its Bluetooth capability. No extra cost for hi-fi components or complicated wiring is required. Only Bluetooth speakers or headphones you might have for iPhones are required to enjoy the world of vinyl records.

Designed for music enthusiasts, the belt-drive motor ensures a clearer sound than direct-drive DJ players, while selectable outputs, Phono, Line or Bluetooth allow you to connect any type of amplifiers, powered speakers or Bluetooth devices.

Unlike many budget turntables, the TN-180BT employs a single wooden board cabinet with high-density MDF to dampen vibrations and provide clearer and richer sound.

For music lovers who have been collecting vinyl records for decades or those just starting out, TEAC's TN-180BT delivers the true sound of vinyl records.

Main features

- 3-speed Belt-drive turntable supporting 33/45/78 rpm
- Built-in Bluetooth transmitter to BT speakers or headphones
- Built-in Phono equalizing amplifier and Phono and Line outputs
- High-density MDF cabinet for improved resonance reduction
- Sleek design in black, white or cherry finish
- Auto-return and manual arm lifter
